

SAMMAN

Software Engineer,
Front End Developer

EXPERIENCE

**Prodigy Infotech,
Mumbai, India (Remote)
Web development Intern**

During my internship, I worked on numerous projects such as building a fully responsive web page with scroll animations, a stopwatch, a tic tac toe game, and a weather application that fetches data from weather API.

**Hisky Tech
Sargodha, Pakistan (Remote)
Front End Web development Intern**

During my internship, I worked on numerous projects such as an input validation contact form, a responsive landing page with smooth scrolling using locomotive.js, a to-do list with local storage, and a real-time chat application with the help of sockets.io.

Bits and Bytes of Computer Networking Google

PROJECTS

Clone of Sundown Studio Website

I Developed a pixel-perfect clone of the Sundown Studio website.

Clone of LAZAREV Website

I developed an exact clone of the LAZAREV website, demonstrating a strong ability to replicate complex web designs and functionalities.

DBMS of Bank Management System

I Developed it as my academic project with the help of MySQL and PHP.

Web Engineering Project for interior design website

I expertly crafted a visually stunning website for interior decor.

Clone of Rejouice Website

Implemented smooth animations and transitions using GSAP.
Integrated AOS for on-scroll animations to enhance user engagement with the amalgam of Locomotive Scroll for smooth scrolling.

Retro Design Website

Developed a visually appealing landing page with a retro design theme, showcasing creativity and design skills with a curated selection of vintage inspired prints, perfect for adding a touch of nostalgia to any space
