EXPERIENCE

Prodigy Infotech, Mumbai (Remote) — *Web Development Intern*

1 August 2024 - 31 August 2024

- I created a responsive landing page and enhanced its UX/UI with on-scroll animations using aos.js, swiper.js, GSAP, and animi.js.
- I made a Stopwatch web application with features of starting, pausing, resetting, tracking, and displaying lap times.
- I made a Tic-Tac-Toe Web application.
- I made a weather application that fetches weather data from weather API based on the user's location or a user-inputted location.

Hisky Tech, Sargodha (Remote) — *Front-End Development Intern*

23 July 2024 - 23 Aug 2024

- Interactive to-do list with persistent local data storage where users can add, edit, and delete tasks.
- I developed a real-time chat application using WebSockets.
- Responsive web page.
- Contact form with input validation using HTML, CSS, JS, and Web3.

Enfotrix, Sargodha (Onsite) — *Web Development Intern*

07 Nov 2024 - Present

EDUCATION

University of Sargodha, Sargodha — *BS Software Engineering*

2021- 2025

CGPA till 6th semester 3.93/4

SKILLS

Project-Documentation: Confluence

Project Management: JIRA, Project LIBRE

Web Development: HTML, CSS, JavaScript, GSAP, React. Js, React Three Fiber, React Redux, Tailwind CSS, MongoDB, SQL, Node JS, Express Js, Typescript.

CERTIFICATES

- I completed the "AI Business and Future of Work" course at Lund University, showcasing expertise in artificial intelligence and business strategies.
- I earned a professional certificate in Digital Marketing from the University of Illinois Urbana-Champaign, demonstrating proficiency in modern marketing techniques and strategies.
- I received a certificate from Google in "Bits and Bytes of Computer Networking".

PROJECTS

Food Delivery Website

I developed a responsive food delivery application using React and Redux. I designed a dynamic menu display that fetches items from the API and managed shopping cart functionality with state management via Redux.

Clone of Sundown Studio Website

I developed a pixel-perfect clone of the LAZAREV website.

Clone of Rejouice Website

Implemented smooth animations and transitions using GSAP. Integrated AOS for on-scroll animations to enhance user engagement with the amalgam of Locomotive Scroll for smooth scrolling.

Clone of LAZAREV Website

I developed an exact clone of the LAZAREV website, demonstrating a strong ability to replicate complex web designs and functionalities.

Web Engineering Project for interior design website

I expertly crafted a visually stunning website for interior design as my academic project.

Retro Design Website

I developed a visually appealing landing page with a retro design theme, showcasing creativity and design skills with a curated selection of vintage-inspired prints, perfect for adding a touch of nostalgia to any space.

DBMS of Bank Management System

I developed it as my academic project with the help of MySQL and PHP.

Clone of Awwards Winning Website Ochi

I have developed a fully responsive clone of the Awwwards-winning Ochi website using React for component-based architecture, ensuring efficient and modular development. Implemented advanced animations and smooth transitions using Framer Motion, achieving a dynamic user experience that closely mirrors the original site.

Studio Website

I created a dynamic and visually engaging studio website using React. I integrated GSAP to implement smooth, interactive animations that enhance the user experience. Additionally, I utilized Three.js to incorporate 3D elements, adding depth and a modern aesthetic to the site.
